PROFESSIONAL SUMMARY

Computer Science graduate with a minor in Mathematics and experience in data analysis, machine learning, and full stack development. Skilled in Python, SQL, and data visualization, with strong analytical and problem solving abilities. Experience leading technical projects, conducting data analysis, and building practical solutions to complex problems. Eager to contribute to data driven and software development projects while leveraging technical skills to build impactful solutions.

EDUCATION

Lincoln University, Pennsylvania, USA | May 2026

B.S. Computer Science, Minor in Mathematics | Summa Cum Laude | GPA: 3.976

TECHNICAL SKILLS

- Languages: Java, Python, C++, JavaScript, HTML, CSS, SQL
- Frameworks/Libraries: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Tkinter, Node.js, React
- Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Math Tutor

Lincoln University, Pennsylvania | January 2024 - May 2026

- Provided tutoring in Algebra through Calculus II, improving students' problem-solving and analytical skills
- Supported academic success through personalized instruction and collaboration with faculty

Machine Learning Intern

DaMAD-ScientistCorps Summer Research Program | May 2025 - June 2025

- Developed a phishing email detection system using supervised machine learning (Logistic Regression, Random Forest, SVM) on 49,000+ emails
- Achieved 97.7% accuracy, 99.1% precision, and 97% recall, improving classification of phishing vs legitimate emails
- Engineered 20+ phishing indicators, link counts, and sender domain analysis, improving detection reliability
- Evaluated 8 ML models, identifying supervised learning as most effective and reducing false positives
- Built an end-to-end pipeline using TF-IDF (300 features) and integrated real-time predictions via APIs

Data Science Intern

Lincoln University, Pennsylvania | June 2024 - July 2024

- Conducted data analysis using Python (Pandas, NumPy) on environmental contamination solutions across air, water, and soil
- Created visualizations and comparative analyses to identify trends and evaluate effectiveness of different approaches
- Presented data driven insights through reports and presentations to support decision making

PROJECTS

InstaRecipe – AI-Powered Recipe Generator

- Developed a full stack web application that generates personalized recipes based on user input ingredients using the OpenAI API
- Built a responsive frontend with React and implemented backend functionality using Supabase for data storage and user interaction
- Designed features for users to upload, rate, and review recipes, enabling a collaborative and interactive platform
- Applied Agile development practices to iteratively improve functionality and user experience

Codexia – Dyslexia-Friendly Coding Platform

- Designed and developed a web platform to improve accessibility in programming education for users with dyslexia
- Implemented customizable interface features including font size, color, and layout to reduce cognitive load and enhance readability
- Integrated AI-based explanations to help users understand code and debug errors through text and audio support
- Structured coding exercises by difficulty level to support progressive skill development and user engagement
- Received Honorable Mention at the 2026 Lincoln University Undergraduate Research Symposium after earning a perfect score from the judges

ACHIEVEMENTS & CERTIFICATIONS

- President's Award, Lincoln University (2025-2026). Recognized among top 10 students by GPA in graduating class
- Provost's Award 2023-2024
- Chi Alpha Sigma (National College Athlete Honor Society)
- Best Undergraduate Poster Award, Delaware Data Science Symposium 2025
- Dean's List (every semester)
- Highest GPA accolade for Women's Soccer 2022-2023 & 2023-2024 | CACC Women's Soccer All-Academic Team 2024
- Diplomas in: Introduction to Windows, Internet & Mail, Microsoft PowerPoint, Basic PC Operator, Microsoft Word

LANGUAGES

Spanish | English
